WORK EXPERIENCE

GitHub Administrator

ZINDI

May 2021- July 2022

- Collaborated with data engineers and team leads by creating models using Python, Docker, and AWS to create community building models increasing company's growth by 15%.
- Completed uploading solutions of top data scientists on Zindi's GitHub page.
- Created documentation for data scientists to adhere on the Zindi platform.

Cloud Engineer

CURATIVE INC.

April 2020 - January 2021

- Designed non-monolithic highly available, scalable, secure, elastic, self-healing, and fault tolerant architectures for business continuity and provision for disaster recovery.
- Monitored resources and applications using AWS Cloud Watch including creating alarms to monitor metrics such as EC2, ELB, EBS, ELI, S3, SNS, and configured notifications for the alarms.

Process Executive

INFOSYS WORKING WITH VERIZON

January 2020- March 2020

- Troubleshooting devices and networks to diagnose issues relating to the problem.
- Used the Cisco transmitting phone device for enhanced communication to customers.

AWS Solution Architect

CODEWEBIFY

June 2019 - August 2019

- Worked closely with customers to get to know their business and technical goals and challenges.
- Implemented versioning and server-side encryption using KMS on S3 buckets to maintain critical data integrity.
- Interviewed clients to gather and document architecture requirements.
- Configured security groups to the various authorized subnet and IP addresses in AWS.
- Prepared detailed reports on updates to project specifications, progress, identify conflicts and team activities.
